Projects

Responsive Portfolio

> An Portfolio for myself
> Also the User Interface is been done in css.
> I have used javascript to implement minimal logic
>Used tailwind CSS for generic and simpler designing

Calorie and Expense Tracker

> This is an Simpler web application. Which features arithmetic approach
> UI is done by using CSS and create an unique image using user created arithmetic

Block Fund

> An application made using react.js and uses tailwind.css for UI
> Application made to promote CrowdFunding in much more faster and safer way
> Uses MetaMask Wallet For Transcation Process and Uses BlockChain Methodology to transfer tokens.
> For the CryptoCurrency I have used Sepolia TestNet. To Transfer the required goal of the crowdfunding
